

FREEDOM ICT GOVERNMENT PACK: TRUE GOVERNANCE OF BUDGETS AND DOCUMENTS OUTPUT

Budget and environmental impact savings with the Freedom ICT Government Pack

Government departments, agencies or companies that work with government contacts need to manage budgets and meet environmental and carbon footprint targets. With the Freedom ICT Government Pack, we have a suite of products and services that can be tailored to work within government frameworks and guidelines.

Cost and carbon footprint controls... under new management

With the constraints of Civil Service and Contractors guidelines, software needs to be cost effective and functional. Budget constraints mean that cost savings need to be quantifiable and measurable, the Freedom ICT Government Pack does this by incorporating hardware, software and professional services in a way that ensures these are met. Environmental policies can be introduced and enforced (if required) to ensure compliance.

Keeping your budgets on a tight lead

The Freedom ICT Government Pack can provide a range of market leading software and services that work together to bring Government, Civil Service and contractors easy to use, functional and cost-effective solutions that work across Education, Healthcare, local and national Government agencies.

BUDGETS AND BILLING

- External and internal departmental billing and reporting
